

Unsupervised/Transport Only Overnight Visits:

All legs of travel are reimbursable over overnight unsupervised/transport only visits. No block payments are reimbursed. The full duration of the transport only overnight visits will be entered on one visit report in Sprout. This will show a long duration of visit time, but the billing export will exclude any visit time, and this will not be reimbursed.

Overnight visits – All time will be entered in Sprout. Sprout export will not populate any payment for visit time for overnight visits.

Unsupervised/Transport Only Same Day Visits:

Block payments are reimbursed for the same day transport only/unsupervised visits up to 3 hours of visit time. Please enter the entire visit time into the Sprout report. All billable transports regardless of if two or more workers are conducting the visit need to be entered on the same report in Sprout. Please see diagram below for allowable legs of travel.
